PROJECTS

IPL Analytics Dashboard

GitHub ↗

Power BI · Power Query (ETL) · DAX

- Built an interactive Power BI dashboard analyzing IPL historical match, team, and player data across multiple seasons.
- Implemented advanced DAX measures win %, strike rate, economy rate, boundaries ratio and used Power Query for data cleaning and transformation.
- Delivered 4 interactive report pages (Match Analysis, Team Performance, Batter Stats, Bowler Stats) with dynamic slicers for season, team, and venue.

Stock Market Analytics Dashboard

GitHub ↗

Power BI · DAX · Python (Pandas, pandas_ta)

- Built a 6-page interactive Power BI suite analyzing stock market behavior using 5-minute OHLCV historical data.
- Processed and engineered technical indicators from raw OHLCV data using Pandas and pandas_ta before feeding it into the dashboard.
- Implemented trend detection (Moving Average crossovers, Golden/Death Cross) and momentum indicators (RSI, MACD) using DAX.
- Authored accompanying technical documentation explaining the formulas and financial concepts behind each KPI.
